## Transderma HRT Flowable Base Cream:

- Hypoallergenic • Fragrance Free • Paraben Free • Lanolin Free
- Resin Free • Dye Free • Surfactant Free • Carcinogen Free

**Unique ingredient:** Grapeseed Oil

### **Benefits:**

Grape seed oil provides many cosmetic benefits because it contains linoleic acid, a polyunsaturated fat, that is essential to good tissue health. It also has astringent properties that tones and tightens tissue. It provides moisture to the skin, helping to repair damaged skin, fine lines and wrinkles, scaling, flaking and sun damage. It is used in many creams, lotions, lip balms, lipsticks and hair products, and it is completely natural, unlike other manmade products and preservatives found in some cosmetics. Because it is very light weight, grape seed oil is easily and quickly absorbed into the skin offering immediate results.

### **Natural Hormones for Compounding:**

Estriol, Estradiol, Estrone, Progesterone, Testosterone

### **What is a Natural Hormone?**

A natural hormone is defined as a hormone that is IDENTICAL in chemical structure to the hormone produced by the human body – regardless of the source. It is said to be Bio-Identical.

### **What is the Source of Natural Hormones?**

Natural hormones are obtained from sterol analogues found in many varieties of plants, primarily soybean and wild yam. These estrogen and progesterone-like compounds are then transformed in the laboratory to the human bio-identical natural hormones.

### **Sample Formulations:**

Progesterone USP, micronized 20mg/ml to 120mg/ml

Estriol USP 0.05%, 0.5% vaginal application

Estriol USP 2mg/ml to 5mg/ml

Estriol, Estradiol, Estrone 2mg, 0.25mg, 0.25mg/ml

Estriol, Estradiol, Estrone, Progesterone 2mg, 0.25mg, 0.25mg, 30mg/ml

Estriol, Estradiol, Estrone, Progesterone, Testosterone 2mg, 0.25mg, 0.25mg, 30mg, 10mg/ml

Testosterone USP, micronized 1mg/ml to 50mg/ml
